Re : Dufoam polyurethane foam – LEED Product Information

To whom it may concern :

Dutab, as an organization part of Adfast Corp., is committed to quality and environmental friendly products. We are also committed to our internal and external customers, our community and our environment.

Dufoam contains 150g/L of volatile organic compounds.

In accordance with the Energy Star program, when applied properly, Dufoam polyurethane foam system contributes to save on your heating and cooling bill and increase the comfort of your home.

Dufoam polyurethane foam is the ideal insulation system to become more energy efficient.

By air-sealing and insulate all gaps between the attic and the living quarters, you help preventing mold, mildew and high-humidity problems in the house.

By sealing hidden holes, gaps and cracks around window and door frames, electrical outlets, plumbing lines and under the siding, you help prevent insect infestations.

PHYSICAL PROPERTIES:

Isolation factor: 0.032 Kcal/m.h. C (λ)

Vapor permeability: 70g/m²/24 hrs (DIN 53429)

Water absorption: 0.3% vol. (DIN 53429)

Cellular structure: Ca 80% closed cells

Should you have any questions or for further information, do not hesitate to contact a Dutab sales representative or myself.

Mireille Dandurand
